

## Sixth Dimension Villiers School, Southall

### Dimension Common Room

Designer Clara Gaggero was invited to design the new sixth form common room for Villiers High School.

The space comprises three areas: a concentration area in which to study individually, a collaboration area in which to work in groups, and a contemplation area to relax and unwind in.

Working in conjunction with Clara Gaggero Ryebrook Resins laid all three areas in Ryeflow 2000 using a mid grey, yellow and blue.

Ryebrook Resins Ryeflow 2000 is a solvent free, chemical resistant, epoxy resin seamless system. Hard wearing, dust free, and chemical resistant with good resistance to abrasion and impact damage. Ryeflow is easily cleaned and complies with the requirements of the Health & Safety at Work Act.

Preparation to the existing parquet floor included making good chases cut for electrical cables plus mechanically sanding with vacuum recovery to give a clean, keyed surface.

2mm stainless steel trims were put in place where different colour finishes met after application of primer coats, Ryeflow 2000 was applied giving a nominal thickness of 2mm the surface being finally sealed with a clear matt acrylic seal coat.
