

Critical to maintaining hygiene levels, specifying the right floor finish in a hospital environment can significantly reduce shut-down time by minimising maintenance. Offering a tailor-made solution, Ryebrook Resins has 20 years proven experience in providing hard-wearing resin floors for use in a variety of locations requiring a high standard of hygiene. As well as being extremely robust, a Ryebrook resin floor has the added advantage of being seamless, removing the risk of bacteria being harboured in hard-to-clean joints. Chemical resistance allows the use of strong disinfectants and, with the practical option of a radius coved skirting removing fiddly corners, time spent cleaning-up is significantly reduced.

The NHS Trust Hospital in Plymouth specified Ryeflow 3000 to replace damaged sheet vinyl in Theatre Ten. Offering a long-term solution, this solvent-free, self smoothing epoxy resin floor is capable of withstanding penetration from dropped instruments, as well as wear and tear from heavy equipment being moved across the floor. Laid to a 3mm thickness in light grey, the floor has demonstrated exceptional durability over the last 12 months. “The resin floor in Theatre Ten has been a considerable success,” agrees Brian Hummerstone of the Estate Department. “We will certainly consider using it again in other locations.” In any operating theatre even a minor fall could have devastating results. The slip-resistant property of all Ryebrook resin floors is an es-
