

Encouraging pedestrian flow, new improvements to the Erith Riverside Shopping Centre include a sky-blue resin line laid by Ryebrook Resins Ltd to the tiled floor, helping lead shoppers past all 45 retail units.

Incorporating a textured, anti-slip finish for safety, Ryebrook was able to enhance branding by providing an exact colour-match to the blue of the shopping centre logo.

Successfully avoiding disruption to business, Ryebrook laid the central line overnight using a rapid cure system that meant the floor was ready to be walked on by the morning.

Situated on the south bank of the Thames, Erith Riverside Shopping Centre provides over 165,000 sq ft of attractive, clean retailing accommodation allowing a wide variety of shops to be easily accessed by bus or train.

Appointed by Frogmore, project architects ESA Ltd then contracted Ryebrook to improve the aesthetics of the floor by laying a blue resin, route indicator throughout the facility.

Working through the night, Ryebrook's team of professional installers first used mechanical diamond grinders to clean and key the existing floor tiles. Ryegrip

Rapid floor system was specified because, although it consists of three separate layers, each one is capable of drying in under one hour, even in cold or damp conditions. The primer was first laid, followed by a binder coat blinded with quartz aggregate for a slip-resistant finish and lastly a top sealant coat. The blue Ryegrip line also delivers excellent resistance to abrasion, so will remain aesthetically impressive for many years to come.
